

NiceVision ControlCenter™

Redefining IP Video Security

As a fully integrated software application suite, NiceVision ControlCenter™ provides easy-to-use and highly flexible management tools for monitoring and controlling security and safety operations in even the most demanding large scale, multi-site deployments. NiceVision ControlCenter facilitates the quick and effective detection, realization, action and investigation of security events, while seamlessly managing the complete range of NiceVision Smart Video Recorders (SVRs), various edge devices, video analytics and numerous integrations with third-party security systems.

Configuration & maintenance

With NiceVision ControlCenter, system administrators can easily define, configure and monitor hardware and software components such as smart video recorders, encoders, and analytics channels.

Define and configure

- Video performance such as compression levels, bit-rates, and resolution
- User-interface elements – channel names, groups, maps
- Sophisticated VMX behavior with tours, salvos and macros
- Checklists for situation management

Continuously monitor key system components

SVRs, RAIDs, edge devices management servers:

- Maintenance alarms, self-tests, and extracted alarm reports
- Report, print, and save alarm histories, inventory and audit information
- Reset servers and perform controlled shutdowns remotely

Secure system access

Highly secured information access is vital for uninterrupted and highly available security operations.

- Multiple levels of access rights can be assigned across the entire site to groups of users, or to individuals
- Protect data consistency and security with a centralized database
- Strict password management
- Cryptographically authenticated video
- Multiple profiles for users
- Camera specific permissions including viewing, searching, replay or reporting
- Alarm management privileges

Monitoring and review

NiceVision ControlCenter's intuitive user interface gives you immediate access to any camera, instant replay, and drag-and-drop sharing of video with your entire team. It makes the most common surveillance tasks quick and simple, enhancing the efficiency of operations.

- View any camera, in any location, simply by selecting it from a list, map or event, or by keying its number directly on the keyboard
- Drag-and-drop video to display-walls via an advanced Virtual Matrix for instant collaboration
- View live and replayed video on the same screen, at the same time for rapid event verification
- Take control of cameras with familiar PTZ keyboards, on-screen joysticks, or presets
- Run unlimited tours and salvos on workstation monitors or control room display-walls
- Accelerate understanding with agile replay controls – play & pause, jog & shuttle – at up to 1024x normal speed
- Jump directly to events using video tags generated by system triggers such as analytics or event alarms
- Capture and print images for immediate action
- Save and export events for archives or evidence

Managing situations

Improve the quality and speed of critical decision making with NiceVision ControlCenter. Its powerful automation features make detection, verification and the resolution of security events faster and more effective.

- Respond to predefined alerts from NiceVision Analytics, Advanced VMD, or other security systems such as access control
- Assign events to the responsible team or operator
- Share event status and information between authorized users
- See the relevant video which is associated to the event instantly
- Drive operation workflow and confirm critical tasks with automatic checklist display
- Get instant verification – full scenario reconstruction without searching
- Automatically and optimally display the most relevant live and recorded video streams

Powerful investigation

NiceVision ControlCenter provides powerful tools to find the video you need, quickly and easily.

- Use advanced search options by time, date and camera; by detected events; or complex conditions
- Show events and alerts according to the integrated subsystem
- Get a one-click display of events based on predefined times such as the last ten minutes, last hour, or last day
- Synchronized playback and control of multiple cameras
- Automatically filter video to watch relevant events only. For example, find movement in a particular area within a specific timeframe
- Save commonly used searches for one-click reuse
- Quickly spot trends and patterns using timeline view. See how events on multiple channels relate to each other and find relevant video fast
- Create advanced reports and graphs to understand complex security events, audit operations and more
- Export events for forensic examination to portable media
- Archive evidence to local or networked storage
- Export or print event lists for case management and evidence

ABOUT NICE

NICE Systems (NASDAQ: NICE), is the worldwide leader of intent-based solutions that capture and analyze interactions and transactions, realize intent, and extract and leverage insights to deliver impact in real time. Driven by cross-channel and multi-sensor analytics, NICE solutions enable organizations to improve business performance, increase operational efficiency, prevent financial crime, ensure compliance, and enhance safety and security. NICE serves over 25,000 organizations in the enterprise and security sectors, representing a variety of sizes and industries in more than 150 countries, and including over 80 of the Fortune 100 companies. www.nice.com.

ABOUT NiceVision

NiceVision helps leading organizations enhance their security operations and improve performance using intelligent digital video solutions. NiceVision integrates real-time analysis, IP networking, recording and management to enable automatic threat detection, instant verification, event resolution and effective investigation.
